- **Tools:** Excel, Google Sheets
- **Other:** Statistics, Data Cleaning, EDA, Dashboarding

## PROJECTS

### Retail Order Prioritization Dashboard [GitHub](#)

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, Excel

- Analyzed ~12,600 retail transactions to identify revenue concentration, high-value orders, and key customer segments driving business performance
- Executed end-to-end data cleaning and EDA across customer segments, product categories, and sales channels to surface actionable trends
- Designed a KPI dashboard highlighting Average Order Value, revenue share, and prioritization metrics to support data-driven retail decisions

### Video Game Sales Analytics Dashboard [In Progress](#)

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, Tableau

- Engineered an ETL pipeline to clean and preprocess video game sales data — handling missing values, score normalization, and datatype standardization
- Developing 3 interactive Tableau dashboards with KPI slicers for revenue trends, game performance rankings, and user/critic score insights
- Conducting multi-dimensional EDA across global regions, genres, and platforms to identify top-performing titles, regional demand patterns, and publisher-level sales concentration
