PROFESSIONAL SUMMARY

LLM Training Freelancer & MERN Stack Developer with hands-on experience in building full-stack applications. Holds a 1200+ CodeChef rating, reflecting problem-solving abilities. Combines technical skills with a confident presentation-focused personality, enabling clear communication and effective collaboration.

EDUCATION

Bachelor of Technology (Artificial intelligence)	2025 - 2028
Newton School Of Technology, Rishihood University	Grade: 7.6/10.0
Intermediate (Class XII)	2022 - 2024
Shivam Convent	Grade: 80.0%
Matriculation (Class X)	2021 - 2022
Bishop Scott Girl's School	Grade: 93.0%

EXPERIENCE

LLM response refinement trainer September 2024 - Present
Scale Ai *Remote*

- Trained and evaluated **large language model (LLM)** responses for **code generation, reasoning, and accuracy**
- Refined model outputs through **prompt analysis, error correction, and response optimization**
- Contributed to improving **code quality, logical correctness, and instruction-following performance**
- Worked with **Python, JavaScript, and algorithmic problem statements** during model evaluation

PROJECTS

BILLA ([Github](#)) ([Demo](#)) November 2025

- **Tech Stack:** MERN Stack (MongoDB, Express.js, ReactJS, NodeJS), Tailwind CSS
- **Description:** Subscription-based bill management dashboard designed to help users monitor recurring expenses. Provides a centralized interface for tracking subscriptions and financial activity.
- **Features:** Tracks costs and spending patterns with interactive analytics. Sends automated email notifications for upcoming and active subscriptions.

Sarthi AI ([Github](#)) ([Demo](#)) November 2025

- **Tech Stack:** React (Vite), TypeScript, Tailwind CSS, Context API, Google Gemini API, Prompt Engineering, ESLint, Vercel
- **Description:** AI-powered healthcare triage platform acting as an intelligent middle layer between patients and medical professionals. Simplifies symptom understanding, specialist discovery, and maintains a unified longitudinal health record.
- **Features:** AI-driven symptom analysis using Gemini API with context-aware medical guidance. Precision specialist routing, real-time health timeline, and one-tap SOS with live location sharing.

Dynova ([Github](#)) ([Demo](#)) November 2025

- **Tech Stack:** MERN Stack (MongoDB, Express.js, ReactJS, NodeJS)
- **Description:** Dynamic form builder application with an integrated analytics dashboard. Enables users to design and manage custom forms efficiently.
- **Features:** Allows creation of customizable forms with structured data collection. Visualizes response data through charts and analytics dashboards.

Revuva ([Github](#)) ([Demo](#)) May 2025

- **Tech Stack:** HTML, CSS, JavaScript
- **Description:** Web-based platform for reviewing online products with a focus on user engagement.

- **Features:** Browse products, submit reviews, and share community feedbacks and ratings.

Car price prediction model(ML) ([Github](#)) ([Demo](#))

April 2025

- **Tech Stack:** Python, Pandas, NumPy, Matplotlib, Machine Learning
- **Description:** Machine learning model using linear regression to predict second-hand car prices.Trained on structured vehicle data to identify pricing patterns.
- **Features:** Performs data preprocessing, feature analysis, and visualization.Predicts car prices based on key vehicle attributes and specifications.

SKILLS

Computer Languages: C++, Python, JavaScript, CSS, HTML, Machine Learning

Data Tools: PostgreSQL

Software Packages: MySQL, Express JS, Prisma ORM, Figma, Matplotlib, Pandas, Node.js, React

EXTRA-CURRICULAR ACTIVITIES

- **Top 20% globally in WorldQuant IQC** for alpha submissions
- Ranked among **Top 500 teams in MITIT 2024**
- Participated in **Smart India Hackathon** (5-member team)
- Contributed to **UI/UX design and gameplay module development**
- Completed a **100 km endurance walk**
