LinkedIn ✦ GitHub ✦ Codeforces ✦ LeetCode

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Data Visualization and Analytics, with a focus on transforming complex datasets into actionable insights. Expert in building interactive dashboards and performing predictive modeling to identify trends and optimize decision-making. Proven track record in solving 250+ DSA problems (Codeforces 1039), demonstrating strong logical reasoning. Passionate about leveraging AI and modern visualization stacks to bridge the gap between raw data and strategic outcomes.

EDUCATION

Newton School of Technology, Rishihood University Bachelor of Technology (Artificial Intelligence)	2024 - 2028 Grade: 7.5/10.0
Narayana e-Techno School and Jr College Intermediate (Class XII)	2022 - 2023 Grade: 70.67%
Rita Memorial High School Matriculation (Class X)	2020 - 2021 Grade: 83.0%

SKILLS

Data Analytics	Exploratory Data Analysis (EDA), Statistical Modeling, Predictive Analytics
Visualization	Matplotlib, Seaborn, Streamlit Dashboards, Figma (UI/UX)
Languages	Python (Pandas, NumPy, Scikit-learn), SQL, C++, JavaScript
Tools & Frameworks	LangChain, LangGraph, Git/GitHub, Prisma ORM, React, Node.js
Core Competencies	Data Structures, Algorithmic Problem Solving, Machine Learning

PROJECTS

Road Traffic Accident Severity Analysis <i>GitHub Project</i>	March 2026
- Conducted a comprehensive data-driven analysis of traffic accident patterns to identify key risk factors contributing to injury severity. - Implemented data cleaning, feature engineering, and statistical modeling to provide insights into road safety improvements. - Leveraged Python libraries (Pandas, Seaborn) to visualize correlations between environmental conditions and accident outcomes.	
Video Game Sales Analysis & Dashboard <i>GitHub Project</i>	Feb 2026
- Developed an end-to-end analytical pipeline to study global video game market trends across different platforms, genres, and regions. - Created interactive visualizations to highlight historical sales peaks and predict regional market dominance. - Utilized EDA techniques to uncover hidden trends in the gaming industry, assisting in data-backed decision-making for product launches.	

DECLARATION

I hereby declare that all the details furnished above are true to the best of my knowledge and belief.
